Only the label from September 16th 2011, has been object of the examination. Merely the producer`s/seller`s statements have been the basis for this and the nutrition informations.

It is explicitly pointed out to the company, that presents the product in the market, that:

1. It has not been examined by the expert to what extent some of the ingredients can be considered as to be equal to the status of food additives in the sense of § 2 (3) No.1 and No. 3 LFGB (german lex specialis).
2. Claims concerning health benefits or effects on the label, instruction leaflets or in other demonstrations towards the consumer have not been examined, if they were scientifically evaluated.
3. All ingredients have to comply with EC-European hygienic regulations.
4. The label has to be in accordance with article 7 of the DIRECTIVE 2000/13/EC:

The quantity of an ingredient or category of ingredient used in the manufacture or preparation of a foodstuff shall be stated

- where the ingredient or category of ingredients concerned appears in the name under which the foodstuff is sold or is usually associated with that name by the consumer; or

- where the ingredient or category of ingredients concerned is emphasised on the labelling in words, pictures or graphics; or
- where the ingredient or category of ingredients concerned is essential to characterise a foodstuff and to distinguish it from products with which it might be confused because of its name or appearance.
